

ART | SAN STUDIOS

ABOUT US

Company Name: Artisan Studios

Artisan is a skilled person that does arts and crafts in a traditional way or by using their hands.

We are a typical college students' clique. We share the same interests like gaming, problem solving and creating our own version of things. We like doing things from scratch but just like everyone, we also need help from our peers that is why we decided to team up. Our circle is stern yet democratic for we maintain our standards when doing things but also allow any proposition and decide as one.

Mission

To establish a company capable of creating and developing games that captivate the audience through its accessibility and uniqueness. To provide an engaging community that actively promotes critical-thinking and allows each other to freely communicate and cultivate companionship. To continuously grow individually while maintaining harmony as a team; leaving a distinction in the gaming community.

Vision

We will be renowned game developers and be included and regarded as one of the best in the industry.

Logo Theme and Symbolism

- **Fire** – The dedication and skill that every member of the company reflects.
- **Wood** – The stability, hardness, and continuity of the game.
- **Metal** – Binds the ability of each member that supports the company.
- **Light** – The entertainment and the knowledge that the games give off to the players.
